Inground Pool Preparation Guide

Review the steps below to prepare for your first on-site meeting with our Installation Team

- 1. Check your property and identify the best access point. We need about 8' (hopefully avoiding driveways) to the work area.
- 2. Do you have space for the pool you're interested in? Please review our website or brochure to have an idea of what style pool you prefer. Have a survey/plat ready to help determine easements, setbacks etc.
- 3. Be aware of the area in which you plan to build a pool. (Is it free from Power & Gas lines, septic tanks etc.?)
- 4. Determine how you will purchase your pool. If you decide to finance and need assistance, we have information on our website to help: <https://paradisepools-sc.com/pools/financing/>

Note: We build fiberglass or vinyl lined pools only. We do not build gunite pools. Our pool packages range from the upper 30's to the mid 50's. Our lead times are approximately six months at this time and expected to go further out as we come closer to the end of the year.

Paradise Pools has been blessed with an abundance of work in these difficult times and we very much appreciate your interest in Paradise Pools. Our hearts go out to all those who have not been so fortunate. Thanks for your patience and understanding.

Due to an overwhelming demand since Apr/May 2020, the pool industry has been challenged with not only a high demand, but also a decrease in productivity due to the coronavirus and social distancing. We know that a lot of interested customers have not been contacted. Please understand, it's not because we don't want your business. We simply have capacity limits as with any company. We are working off of an extensive list of inquiries and will contact you in the order we receive requests. Thanks again for your patience.
